WORK EXPERIENCE

NEXTWEBI IT SOLUTIONS, BANGALORE **Nov 2025 - Present**

Full Stack Developer

E-commerce Platform for a Manufacturing Company (B2B and B2C)

- Developed a combined B2B and B2C e-commerce application with separate pricing and order flows for dealers and retail customers.
- Built the complete admin UI in React.js, integrated with the ASP.NET Core Web APIs, giving the operations team one place to manage products, pricing, branch inventory, orders, shipping and returns.
- Built branch-wise inventory management and split order fulfilment across branches, cutting out-of-stock order failures by about 30%.
- Implemented order management, shipping, cancellation and return flows with automatic refunds on approved requests.
- Built dashboards and reports for sales, orders and branch stock, with products, categories and pricing managed dynamically from admin.

Travel Booking Platform (Flights, Hotels, Activities and Insurance)

- Built the ASP.NET Core Web API layer for flights, hotels, activities and insurance, integrated with TBO for live inventory and fares.
- Covered LCC and Non-LCC, domestic and international, one way and round trip flows, plus SSR booking that added ancillary revenue on roughly 20% of bookings.
- Delivered cancellation, auto refund and payment gateway flows, reducing refund turnaround from 2 to 3 days to under 1 hour.
- Built admin dashboards for bookings, revenue and cancellations, with markups and commissions configurable without code changes.

EdTech Platform with Multi-Level Referral System

- Owned both front end and back end on ASP.NET Web Forms, from UI pages to business logic and database queries.
- Built course packages that bundle multiple courses, with order and payment management.
- Developed a multi-level referral and commission module with separate payout models for managers and affiliates, cutting monthly payout processing time by around 70%.
- Created admin dashboards and reports for sales, referral trees and earnings.

WYZMINDZ SOLUTIONS, BANGALORE **Sep 2023 - Nov 2025**

Full Stack Developer

- Built and maintained features across the UI and backend of a .NET CRM product, reducing customer response times by 30% and improving lead conversion by 25%.
- Developed an automated lead allocation system that improved lead response efficiency by 50% and raised sales conversion by 20%.
- Integrated SMS, email and WhatsApp messaging, cutting notification delivery latency by 60% and lifting customer engagement by 35%.
- Automated repetitive tasks across projects, improving operational efficiency by 30% and lowering error rates by 20%.
